

Keep your home
safe and **protected**

Brett Morris Homes

Types of screens

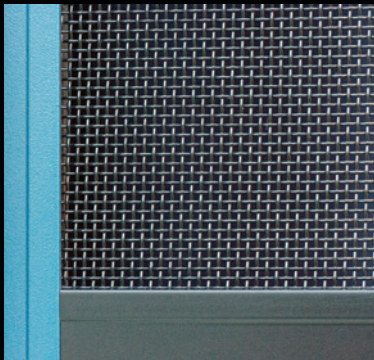

Specially designed to fit Bradnam's windows and doors, our range of screens provides natural ventilation while protecting against insects and unwanted intruders.

Available in three types: insect, safety, and security – Bradnam's window and door screens offer both comfort and peace of mind. Insect screens keep pests outside where they belong, without obstructing airflow or visibility.

The safety range features classic diamond grilles and mesh to deter intrusion and improve household safety. For the highest level of protection, security screens can't be overlooked, offering both Stainless View™ and Ali View™ options for superior strength and unrestricted views.

Key features

Stronger mesh

Security Screen only

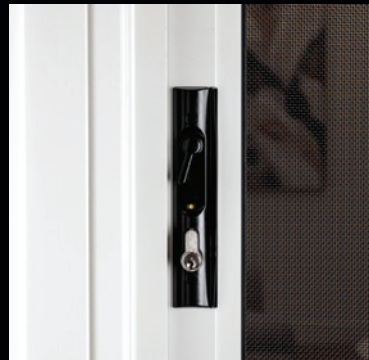

Made from T316 marine grade stainless steel (Stainless View™) or perforated aluminium panels (Ali View™)

Attractive grille

Safety Screen only

Diamond grilles are available in a range of colours

Why choose security screens

Stronger mesh

For those who refuse to compromise on safety, security screens are essential. Stainless View™ mesh is made from T316 marine-grade stainless steel, while the perforated aluminium mesh by Ali View™ is made from structural-grade alloy. Both security options meet strict Australian Standards, ensuring peace of mind.

		Stainless View™	Ali View™
AS5039-2008	A range of rigorous tests designed to simulate dynamic impact and tool attacks. These tests ensure the strength and integrity of the product are maintained against forced entry.	+	+
AS3959-2009	This Australian standard covers the bushfire safety requirements of building in a bushfire prone area.	+	Complies up to and including BAL 29
BCA – Fall Prevention Provision	Building construction requirements to minimise the risk of small children falling from windows and balconies.	+	+

Innovative fixing system

Innovation drives the Stainless View™ and Ali View™ ranges – proof that security can be strong, streamlined, and completely free from compromise. Manufactured without traditional mechanical fixings including screws and rivets, Bradnam's uses 3M VHB acrylic adhesive to ensure that no contact is made between the mesh and the locked-in aluminium frame. This effectively minimises the chance of galvanic corrosion as there are no metal mechanical fixings to initiate the corrosion process.

Safe for Kids

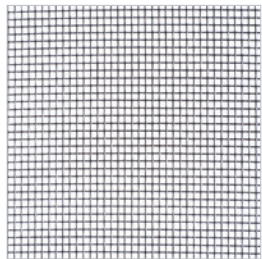

If you have small children, adding a security screen to your Bradnam's windows helps keep them safe at home. Beyond keeping insects and unwanted guests out, these screens add an extra layer of security – reducing the risk of falls from second-storey windows and providing peace of mind for families.

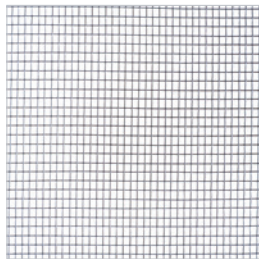

Mesh options

At Bradnam's, we provide flexible options to personalise your screens to best suit your space, design, and lifestyle requirements. Enjoy complete creative freedom with our extensive selection of mesh types across the insect, safety, and security ranges for your individual Bradnam's windows and doors.
